Thin Solid Films 333 (1998) 297–301

thin solid films

Subject Index of Volume 333

Alkali halides
Grazing incidence X-ray diffraction analysis of alkali fluoride thin films for optical devices, 157
Aluminum
Effect of temperature and substrate on the growth behaviors of chemical vapor deposited Al films with dimethylethylamine alane source, 137
Aluminium nitride
Optical properties of AlN thin films correlated with sputtering conditions, 251
Amorphous hydrogenated carbon
Structure changes in a-C:H films in inductive CH_4/Ar plasma deposition, 103
Amorphous materials
Amorphous lithium cobalt and nickel oxides thin films: preparation and characterization by RBS and PIGE, 16
Amorphous hydrogenated carbon nitride films deposited via an expanding thermal plasma at high growth rates, 29
The adsorption of monolayer coatings on iron nanoparticles: Mössbauer spectroscopy and XANES results, 41
The effect of post-deposition transverse current injection on amorphous indium oxide film conductivity, 150
Amorphous SiGe:H
Frequency-resolved photoconductivity in a-SiGe:H, 240
Angular selective windows
Investigation of angular selective optical properties of silver/titanium oxide cermet thin films, 185
Anisotropy
Investigation of angular selective optical properties of silver/titanium oxide cermet thin films, 185
Uniaxially oriented polyamide films in-plane prepared by vacuum deposition polymerization methods assisted by oblique ion irradiation, 213
Berkovich nanoindentation proceess
Simulation of Berkovich nanoindentation experiments on thin films using finite element method, 278
Bismuth molybdates
A chemical vapour deposition route to MoO_3–Bi_2O_3 thin films, 35
Bismuth oxide
A chemical vapour deposition route to MoO_3–Bi_2O_3 thin films, 35
Bistable luminescence
Influence of thermal and electronic modifications of the GaAs bandgap on bistable luminescent light emitted from a thin CdS film, 134
Cadmium sulphide
Influence of thermal and electronic modifications of the GaAs bandgap on bistable luminescent light emitted from a thin CdS film, 134
Carrier lifetime
Frequency-resolved photoconductivity in a-SiGe:H, 240
Cathodes
Amorphous lithium cobalt and nickel oxides thin films: preparation and characterization by RBS and PIGE, 16
CeO_2
Microstructure of yttrium stabilized ZrO_2 crystals with CeO_2 and $SrTiO_3$ intermediate layers, 207
Chalcogenides
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 287
Chemical mechanical polishing
XPS and AFM study of chemical mechanical polishing of silicon nitride, 219
Chemical vapor deposition
Characterization of SiGe base layer in Si/SiGe heterojunction bipolar transistor layer structure, 13
A chemical vapour deposition route to MoO_3–Bi_2O_3 thin films, 35
Oxy-acetylene flame chemical vapour deposition of diamond film. Part II: the influence of deposition parameters on diamond composition, 65
Moisture-resistant properties of SiN_x films prepared by PECVD, 71
Effect of temperature and substrate on the growth behaviors of chemical vapor deposited Al films with dimethylethylamine alane source, 137
Growth characteristics and electrical resistivity of chemical vapor-deposited tungsten film, 108
Iron–iron oxide composite thin films prepared by chemical vapor deposition from iron pentacarbonyl, 203
Coatings
Moisture-resistant properties of SiN_x films prepared by PECVD, 82
Formation and characterization of multiphase film properties of (Ti–Cr)N formed by cathodic arc deposition, 88
Coercivity
Iron–iron oxide composite thin films prepared by chemical vapor deposition from iron pentacarbonyl, 203
Composite film
Iron–iron oxide composite thin films prepared by chemical vapor deposition from iron pentacarbonyl, 203
Computer simulation
Monte Carlo simulations of sputter deposition and step coverage of thin films, 77
Condensation
New sol-gel oxygen sensor based on luminescence cyclometallated platinum complexes, 224
Conductivity

PII S0040-6090(98)01474-6

The effect of post-deposition transverse current injection on amorphous indium oxide film conductivity, 150
Effect of photocrystallization on the photoconductivity of a-$Se_{80}Te_{20}$, 165
AC electrical properties of vacuum deposited Au–SiO_x–Au sandwich structures after electroforming, 170
Influence of periphal electron-withdrawing substituents on the conductivity of zinc phthalocyanine in the presence of gases. Part 2: oxidizing gases, 228
Copper
Adhesive metal films obtained by thermionic vacuum arc (TVA) deposition, 95
Crystalization
Effect of photocrystallization on the photoconductivity of a-$Se_{80}Te_{20}$, 165
Deposition process
Sputter deposition of gallium nitride films using a GaAs target, 9
Optical losses of multilayer stacks synthesized with silicon oxynitride by r.f. magnetron sputtering, 126
Uniaxially oriented polyamide films in-plane prepared by vacuum deposition polymerization methods assisted by oblique ion irradiation, 213
Significance of substrate temperature on the properties of flash evaporated $CuIn_{0.75}Ga_{0.25}Se_2$ thin films, 235
Diamond
Oxy-acetylene flame chemical vapour deposition of diamond film. Part II: the influence of deposition parameters on diamond composition, 65
Diamond-like carbon
Monitoring laser-induced microstructural changes of thin film hydrogenated amorphous carbon (a-C:H) using Raman spectroscopy, 114
Dielectric properties
AC electrical properties of vacuum deposited Au–SiO_x–Au sandwich structures after electroforming, 170
Elastic properties
Stresses in Al/TiW/Si(100) contacts during thermal cycling, 264
Electrical properties and measurements
The effect of post-deposition transverse current injection on amorphous indium oxide film conductivity, 150
AC electrical properties of vacuum deposited Au–SiO_x–Au sandwich structures after electroforming, 170
Electrical properties
Electrical, optical and photovoltaic effect in pyronine G (Y) based thin film sandwich devices, 176
Electroless
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 287
Ellipsometry
Optical properties of AlN thin films correlated with sputtering conditions, 251
Evaporation
Significance of substrate temperature on the properties of flash evaporated $CuIn_{0.75}Ga_{0.25}Se_2$ thin films, 235
Exciton
Electrical, optical and photovoltaic effect in pyronine G (Y) based thin film sandwich devices, 176
Film
A comparative study on the nucleation and growth of ECR-PECVD PLZT ((Pb,La)(Zr,Ti)O_3) thin films on Pt/SiO_2/Si substrates and on Pt/Ti/SiO_2/Si substrates, 142
Finite element method
Simulation of Berkovich nanoindentation experiments on thin films using finite element method, 278
Fluorescence
Excitation energy transfer in Langmuir–Blodgett films of 5-(4-*N*-octadecylpyridyl)-10,15,20-tri-*p*-tolylporphyrin on gold-evaporated glass substrates studied by time-resolved fluorescence spectroscopy, 1
Fluorides
Ion beam-assisted deposition of MgF_2 and YbF_3 films, 191
Ge islands
Growth temperature effect on the heteroepitaxy of InSb films on a Si(00l) substrate covered with Ge islands, 60
Gold
Excitation energy transfer in Langmuir–Blodgett films of 5-(4-*N*-octadecylpyridyl)-10,15,20-tri-*p*-tolylporphyrin on gold-evaporated glass substrates studied by time-resolved fluorescence spectroscopy, 1
Guided-mode resonance absorption
The adsorption of monolayer coatings on iron nanoparticles: Mössbauer spectroscopy and XANES results, 82
Heat treatment
Stresses in Al/TiW/Si(100) contacts during thermal cycling, 264
Heteroepitaxy
Growth temperature effect on the heteroepitaxy of InSb films on a Si(00l) substrate covered with Ge islands, 60
Heterostructures
Characterization of SiGe base layer in Si/SiGe heterojunction bipolar transistor layer structure, 13
Hydrogen
Growth characteristics and electrical resistivity of chemical vapor-deposited tungsten film, 108
Hydrogenated amorphous carbon (a-C:H)
Monitoring laser-induced microstructural changes of thin film hydrogenated amorphous carbon (a-C:H) using Raman spectroscopy, 114
Indium oxide
The effect of post-deposition transverse current injection on amorphous indium oxide film conductivity, 150
InSb
Growth temperature effect on the heteroepitaxy of InSb films on a Si(00l) substrate covered with Ge islands, 60
Interface
A comparative study on the nucleation and growth of ECR-PECVD PLZT ((Pb,La)(Zr,Ti)O_3) thin films on Pt/SiO_2/Si substrates and on Pt/Ti/SiO_2/Si substrates, 142
Intermediate layers
Microstructure of yttrium stabilized ZrO_2 crystals with CeO_2 and $SrTiO_3$ intermediate layers, 207
Ion bombardment
Atomic transport in Cu/Ge and Co/Ge systems during ion-beam mixing, 20
Structure changes in a-C:H films in inductive CH_4/Ar plasma deposition, 103
Ion beam-assisted deposition of MgF_2 and YbF_3 films, 191
Iron
Iron–iron oxide composite thin films prepared by chemical vapor deposition from iron pentacarbonyl, 203

Iron oxide
Iron–iron oxide composite thin films prepared by chemical vapor deposition from iron pentacarbonyl, 203
Iron pentacarbonyl
Iron–iron oxide composite thin films prepared by chemical vapor deposition from iron pentacarbonyl, 203
Langmuir–Blodgett films
Excitation energy transfer in Langmuir–Blodgett films of 5-(4-*N*-octadecylpyridyl)-10,15,20-tri-*p*-tolylporphyrin on gold-evaporated glass substrates studied by time-resolved fluorescence spectroscopy, 1
Laser irradiation
Monitoring laser-induced microstructural changes of thin film hydrogenated amorphous carbon (a-C:H) using Raman spectroscopy, 114
Luminescence
Influence of thermal and electronic modifications of the GaAs bandgap on bistable luminescent light emitted from a thin CdS film, 134
New sol-gel oxygen sensor based on luminescence cyclometallated platinum complexes, 224
Mössbauer spectroscopy
The adsorption of monolayer coatings on iron nanoparticles: Mössbauer spectroscopy and XANES results, 41
Merocyanine
Photocurrent increment in organic solar cell with mixed solid of merocyanine and zinc porphyrin, 256
Metallization
Adhesive metal films obtained by thermionic vacuum arc (TVA) deposition, 95
Effect of temperature and substrate on the growth behaviors of chemical vapor deposited Al films with dimethylethylamine alane source, 137
Stresses in Al/TiW/Si(100) contacts during thermal cycling, 264
Molybdemum oxide
A chemical vapour deposition route to MoO_3–Bi_2O_3 thin films, 35
Morphology
Sexithiophene thin films epitaxially oriented on polytetraflouroethylene substrates: structure and morphology, 272
Multilayers
Preparation of the nucleoside-containing nanolayered film by the layer-by-layer deposition technique, 5
Optical losses of multilayer stacks synthesized with silicon oxynitride by r.f. magnetron sputtering, 126
Nanostructures
The adsorption of monolayer coatings on iron nanoparticles: Mössbauer spectroscopy and XANES results, 41
Nitrides
Sputter deposition of gallium nitride films using a GaAs target, 9
Amorphous hydrogenated carbon nitride films deposited via an expanding thermal plasma at high growth rates, 29
Nuclear reaction
Electrical and optical properties of fluorine-doped ZnO thin films prepared by spray pyrolysis, 196
Nucleation
A comparative study on the nucleation and growth of ECR-PECVD PLZT ($(Pb,La)(Zr,Ti)O_3$) thin films on Pt/SiO_2/Si substrates and on $Pt/Ti/SiO_2/Si$ substrates, 142
Nucleosides
Preparation of the nucleoside-containing nanolayered film by the layer-by-layer deposition technique, 5
Optical coatings
Optical losses of multilayer stacks synthesized with silicon oxynitride by r.f. magnetron sputtering, 126
Investigation of angular selective optical properties of silver/titanium oxide cermet thin films, 185
Ion beam-assisted deposition of MgF_2 and YbF_3 films, 191
Optical device
Grazing incidence X-ray diffraction analysis of alkali fluoride thin films for optical devices, 157
Optical properties
Optical losses of multilayer stacks synthesized with silicon oxynitride by r.f. magnetron sputtering, 126
Influence of thermal and electronic modifications of the GaAs bandgap on bistable luminescent light emitted from a thin CdS film, 134
Investigation of angular selective optical properties of silver/titanium oxide cermet thin films, 185
Ion beam-assisted deposition of MgF_2 and YbF_3 films, 191
Electrical and optical properties of fluorine-doped ZnO thin films prepared by spray pyrolysis, 196
Optical properties of AlN thin films correlated with sputtering conditions, 251
Optical spectroscopy
Optical properties of AlN thin films correlated with sputtering conditions, 251
Organic mixed film
Photocurrent increment in organic solar cell with mixed solid of merocyanine and zinc porphyrin, 256
Organic solar cell
Photocurrent increment in organic solar cell with mixed solid of merocyanine and zinc porphyrin, 256
Organic substances
Uniaxially oriented polyamide films in-plane prepared by vacuum deposition polymerization methods assisted by oblique ion irradiation, 213
Organometallic vapor deposition
Effect of temperature and substrate on the growth behaviors of chemical vapor deposited Al films with dimethylethylamine alane source, 137
Influence of periphal electron-withdrawing substituents on the conductivity of zinc phthalocyanine in the presence of gases. Part 2: oxidizing gases, 228
$(Pb,La)(Zr,Ti)O_3$ (PLZT)
A comparative study on the nucleation and growth of ECR-PECVD PLZT ($(Pb,La)(Zr,Ti)O_3$) thin films on Pt/SiO_2/Si substrates and on $Pt/Ti/SiO_2/Si$ substrates, 142
Photoconductivity
Effect of photocrystallization on the photoconductivity of a-$Se_{80}Te_{20}$, 165
Frequency-resolved photoconductivity in a-SiGe:H, 240
Photovoltaic effect
Electrical, optical and photovoltaic effect in pyronine G (Y) based thin film sandwich devices, 176
Photocurrent increment in organic solar cell with mixed solid of merocyanine and zinc porphyrin, 256
Physical vapor deposition
Monte Carlo simulations of sputter deposition and step coverage of thin films, 77

Adhesive metal films obtained by thermionic vacuum arc (TVA) deposition, 95
Plasma diagnostics
Structure changes in a-C:H films in inductive CH_4/Ar plasma deposition, 103
Plasma enhanced chemical vapor deposition
Residual stress determination in PECVD TiN coatings by X-ray diffraction: a parametric study, 50
A comparative study on the nucleation and growth of ECR-PECVD PLZT ((Pb,La)(Zr,Ti)O_3) thin films on Pt/SiO_2/Si substrates and on Pt/Ti/SiO_2/Si substrates, 142
Plasma processing and deposition
Amorphous hydrogenated carbon nitride films deposited via an expanding thermal plasma at high growth rates, 29
Moisture-resistant properties of SiN_x films prepared by PECVD, 71
Adhesive metal films obtained by thermionic vacuum arc (TVA) deposition, 95
Platinum
New sol-gel oxygen sensor based on luminescence cyclometallated platinum complexes, 224
Polymers
Uniaxially oriented polyamide films in-plane prepared by vacuum deposition polymerization methods assisted by oblique ion irradiation, 213
Polytetraflouroethylene
Sexithiophene thin films epitaxially oriented on polytetraflouroethylene substrates: structure and morphology, 272
Positron spectroscopy
Defect distribution and evolution in He^+ implanted Si studied by variable-energy positron beam, 245
Process parameters
Residual stress determination in PECVD TiN coatings by X-ray diffraction: a parametric study, 50
Pyronine
Electrical, optical and photovoltaic effect in pyronine G (Y) based thin film sandwich devices, 176
Radiaton damage
Atomic transport in Cu/Ge and Co/Ge systems during ion-beam mixing, 20
Raman scattering
Oxy-acetylene flame chemical vapour deposition of diamond film. Part II: the influence of deposition parameters on diamond composition, 65
Monitoring laser-induced microstructural changes of thin film hydrogenated amorphous carbon (a-C:H) using Raman spectroscopy, 114
Recombination
Frequency-resolved photoconductivity in a-SiGe:H, 240
Reflection high-energy electron diffraction
Growth temperature effect on the heteroepitaxy of InSb films on a Si(00l) substrate covered with Ge islands, 60
Residual stress
Residual stress determination in PECVD TiN coatings by X-ray diffraction: a parametric study, 50
Grazing incidence X-ray diffraction analysis of alkali fluoride thin films for optical devices, 157
Rutherford backscattering spectroscopy
Amorphous lithium cobalt and nickel oxides thin films: preparation and characterization by RBS and PIGE, 16
Atomic transport in Cu/Ge and Co/Ge systems during ion-beam mixing, 20
Defect distribution and evolution in He^+ implanted Si studied by variable-energy positron beam, 245
Saturation magnetization
Iron–iron oxide composite thin films prepared by chemical vapor deposition from iron pentacarbonyl, 203
Self-assembly films
Preparation of the nucleoside-containing nanolayered film by the layer-by-layer deposition technique, 5
Self-assembly monolayers
The growth of TiO_2 thin films on mixed self-assembly monolayers from solution, 25
Semiconductors
Sputter deposition of gallium nitride films using a GaAs target, 9
Characterization of SiGe base layer in Si/SiGe heterojunction bipolar transistor layer structure, 13
Effect of photocrystallization on the photoconductivity of a-$Se_{80}Te_{20}$, 165
Influence of periphal electron-withdrawing substituents on the conductivity of zinc phthalocyanine in the presence of gases. Part 2: oxidizing gases, 228
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 287
Sensors
New sol-gel oxygen sensor based on luminescence cyclometallated platinum complexes, 224
Influence of periphal electron-withdrawing substituents on the conductivity of zinc phthalocyanine in the presence of gases. Part 2: oxidizing gases, 228
Sexithiophene thin films
Sexithiophene thin films epitaxially oriented on polytetraflouroethylene substrates: structure and morphology, 272
Si(001)
Growth temperature effect on the heteroepitaxy of InSb films on a Si(00l) substrate covered with Ge islands, 60
Silicon nitride
Moisture-resistant properties of SiN_x films prepared by PECVD, 71
XPS and AFM study of chemical mechanical polishing of silicon nitride, 219
Silicon oxide
AC electrical properties of vacuum deposited Au–SiO_x–Au sandwich structures after electroforming, 170
Silver-silver oxide films
The adsorption of monolayer coatings on iron nanoparticles: Mössbauer spectroscopy and XANES results, 82
Solar cells
Significance of substrate temperature on the properties of flash evaporated $CuIn_{0.75}Ga_{0.25}Se_2$ thin films, 235
Solar control glazing
Investigation of angular selective optical properties of silver/titanium oxide cermet thin films, 185
Sputtering
Sputter deposition of gallium nitride films using a GaAs target, 9
Amorphous lithium cobalt and nickel oxides thin films: preparation and characterization by RBS and PIGE, 16

Monte Carlo simulations of sputter deposition and step coverage of thin films, 77
$SrTiO_3$
Microstructure of yttrium stabilized ZrO_2 crystals with CeO_2 and $SrTiO_3$ intermediate layers, 207
Stress
Structure changes in a-C:H films in inductive CH_4/Ar plasma deposition, 103
Stresses in Al/TiW/Si(100) contacts during thermal cycling, 264
Structure
Sexithiophene thin films epitaxially oriented on polytetraflouroethylene substrates: structure and morphology, 272
Surface plasmon measurements
Preparation of the nucleoside-containing nanolayered film by the layer-by-layer deposition technique, 5
Surface plasmon resonance
The adsorption of monolayer coatings on iron nanoparticles: Mössbauer spectroscopy and XANES results, 82
Surface roughness
XPS and AFM study of chemical mechanical polishing of silicon nitride, 219
Surface structure
Excitation energy transfer in Langmuir–Blodgett films of 5-(4-*N*-octadecylpyridyl)-10,15,20-tri-*p*-tolylporphyrin on gold-evaporated glass substrates studied by time-resolved fluorescence spectroscopy, 1
Texture
Residual stress determination in PECVD TiN coatings by X-ray diffraction: a parametric study, 50
Thin films
A chemical vapour deposition route to MoO_3–Bi_2O_3 thin films, 35
Non-catalytic displacement plating (NCDP) of photosensitive semiconducting thin films, 287
TiN/HSS
Simulation of Berkovich nanoindentation experiments on thin films using finite element method, 278
Titanium
Monte Carlo simulations of sputter deposition and step coverage of thin films, 77
Titanium dioxide
The growth of TiO_2 thin films on mixed self-assembly monolayers from solution, 25
Titanium nitride
Formation and characterization of multiphase film properties of (Ti–Cr)N formed by cathodic arc deposition, 88
Titanium nitride coatings
Residual stress determination in PECVD TiN coatings by X-ray diffraction: a parametric study, 50
Transmission electron microscopy
Characterization of SiGe base layer in Si/SiGe heterojunction bipolar transistor layer structure, 13
Defect distribution and evolution in He^+ implanted Si studied by variable-energy positron beam, 245
Traps
Electrical, optical and photovoltaic effect in pyronine G (Y) based thin film sandwich devices, 176
Tribology
Amorphous hydrogenated carbon nitride films deposited via an expanding thermal plasma at high growth rates, 29
Formation and characterization of multiphase film properties of (Ti–Cr)N formed by cathodic arc deposition, 88
Tungsten
Growth characteristics and electrical resistivity of chemical vapor-deposited tungsten film, 108
Tungsten hexaflouride
Growth characteristics and electrical resistivity of chemical vapor-deposited tungsten film, 108
Vacancies
Defect distribution and evolution in He^+ implanted Si studied by variable-energy positron beam, 245
XANES spectroscopy
The adsorption of monolayer coatings on iron nano-particles: Mössbauer spectroscopy and XANES results, 41
X-ray absorption
Oxy-acetylene flame chemical vapour deposition of diamond film. Part II: the influence of deposition parameters on diamond composition, 65
X-ray diffraction
Characterization of SiGe base layer in Si/SiGe heterojunction bipolar transistor layer structure, 13
Residual stress determination in PECVD TiN coatings by X-ray diffraction: a parametric study, 50
Growth temperature effect on the heteroepitaxy of InSb films on a Si(00l) substrate covered with Ge islands, 60
Grazing incidence X-ray diffraction analysis of alkali fluoride thin films for optical devices, 157
X-ray photoelectron spectroscopy
Electrical and optical properties of fluorine-doped ZnO thin films prepared by spray pyrolysis, 196
XPS and AFM study of chemical mechanical polishing of silicon nitride, 219
Yttrium stabilized ZrO_2 crystals
Microstructure of yttrium stabilized ZrO_2 crystals with CeO_2 and $SrTiO_3$ intermediate layers, 207
Zinc oxide
Electrical and optical properties of fluorine-doped ZnO thin films prepared by spray pyrolysis, 196
Zinc porphyrin
Photocurrent increment in organic solar cell with mixed solid of merocyanine and zinc porphyrin, 256
